Worksite Traffic Controller Attributes

On successful completion of this course, students will be able to:

PC 1	<ul style="list-style-type: none">• Understand the duties and responsibilities of traffic controllers in Western Australia• Identify a stop/slow bat which complies with the Australian Standard• Know the legal authority protecting traffic controllers in Western Australia under the Road Traffic Code (2000)• Identify situations requiring traffic controllers• Identify appropriate dress, equipment and personal protective equipment required for traffic control• Understand what considerations need to be made in case of accident or injury and be able to apply safety measures to minimise risk and hazard• Identify vehicles that require additional considerations such as stopping distance and lane width• Identify an appropriate escape route• Understand the implications arising from poor visibility and the need for sufficient visibility to control traffic effectively• Interact and respond to the needs of motorists and the general public
------	--

Introduction to the Course

The Main Roads W.A. Worksite Traffic Controller (WTC) course delivers a basic understanding on the requirements for controlling traffic with a stop/slow bat in Western Australia. In order to achieve WTC accreditation, candidates must complete RIIOHS205A 'Control Traffic with a Stop/Slow Bat' after completing this course.

People who complete the WTC course will not be awarded any certification until completion of the required national unit of competency stated above, the MRWA Basic Worksite Traffic Management course and RIIOHS302A 'Implement Traffic Management Plan'. Upon completion of the theory components of these courses however, candidates will become an 'Endorsed Trainee' which enables completion of the logbook assessments required for the completion of the national units of competency.

Holders of Main Roads W.A. BWTM and WTC certification are authorised to implement traffic management plans including those involving the controlling of traffic using a stop/slow bat.

Persons who already hold RIIOHS302A 'Implement traffic management plan' and RIIOHS205A 'Control Traffic with a Stop/Slow Bat' will only need to complete the MRWA BWTM course, this course and the associated theory assessments to gain both MRWA BWTM and WTC certifications.

Online Supplementation of the Course

This course is supplemented online at <http://training.qtm.net.au>, a web-based learning environment that is to be used to provide course information and learning material needed for completion of this course.

If you are new to the online environment and require assistance of any kind, please make sure you direct your queries to the appropriate area in order to get the result you need quickly.

For content-related issues, contact your Course Coordinator. For technical issues relating to your online course, please contact your Lecturer. The access to your online course will become available once payment has been received and processed.

This course is offered by on-line delivery.

Advantages:

Flexibility	Allows you to work through course content at a time which suits you, your work and your own learning style.
Accessibility	Equally accessible for persons in all locations e.g. Remote, rural and metro.
Efficiency	No need to travel to course location and be away from work for a number of days.
Economy	No travel and accommodation costs and less 'down time' away from work.

The On-line course package consists of:

Course Notes	Contains most course content divided in to pages, sections and modules for the course. You can work through this material at your own pace and can log in and out at any time without losing your place
--------------	---

Assessment Package This includes:
1. Theory Exam

Online theory examination questionnaire which you must complete.

Using these packages

It is suggested that you read through the course package at your own pace, making note of key points or any areas which are not clear to you. We recommend that you print off a copy of these notes to assist your use of this resource.

Should you have any questions or areas of difficulty, please use the on-line live help facility (or ring 1300 557 930) to register your query with our training staff, one of whom will reply to your query within two working days.

Method of Assessment

Assessment	Type of Assessment	Passmark	Due Date
Assessment 1: Theory Assessment	Written Theory	75%	

NOTE: A satisfactory standard in each component of assessment is necessary for a pass in the course.

Assessment Details

Assessment 1: Theory Assessment

This questionnaire is designed to test your knowledge of the theory and concepts presented in the course package. The minimum pass mark is 75% and the questionnaire usually takes between 10 to 15 minutes to complete.

Some Tips:

- You must complete the questionnaire unassisted by others and also complete the declaration on the cover sheet of the assessment.
- The questionnaire is an 'open book' assessment so you may refer to the course package and any other relevant documentation when completing it.
- Please answer all questions.
- If a question is proving particularly difficult for you, it might be better to move onto another question and come back to the troublesome one at another time.

Assessment Guidelines

The theory assessment for this course is undertaken online and is recorded through our electronic system.

You must pass all assessment requirements to successfully complete this course
